

**What could you tell us about the opportunities to visit the station? Would a translator be needed?**

In case of visits by donors to the sites where we are working, Biometepe and its field team have the ability to coordinate logistics of the activities that could be carried out at the stations when we start. As for translators, there are team members who can speak very good English, so I think it would not be difficult to visit, especially since there is as a tour guide on our team.

**How staff are paid and if they really need COAC funds?**

In this case, the staff is officially paid from Biometepe accounts, the funds that we request are required mainly for the logistics of carrying out the MOSI (Fuel and food for volunteers and equipment). If there is a possibility of support, they can be deposited in our official accounts. All our finances are supervised by the BIOMETEPE Board of Directors.

**Has COVID-19 affected operations there? Have they had access to vaccines?**

We work all the year, sometimes from home, increasing security measures and reducing mass activities. Everyone on our team is vaccinated.
